## Programmes Taught in ENGLISH at Armenian Higher Education Institutions

HIGHER EDUCATION INSTITUTION	Name: <u>Armenian State University of Economics</u> Acronym: <u>ASUE</u> <a href="http://www.asue.am">www.asue.am</a>	PROGRAMME SUPERVISOR CONTACTS
BA Programme(s)	<p><b><u>Name: Bachelor in Management (Tourism Management Concentration)</u></b></p> <p><b><u>Short Description:</u></b> ASUE Bachelor of Management with a concentration on Tourism Management program is designed to prepare students to pursue administrative and management work in the hospitality and tourism industries. The program combines courses in management and business with specialized courses in tourism management. This four-year Bachelor degree is designed to prepare graduates for management careers within the dynamic hospitality and tourism field. Learners develop a solid knowledge of business operations in tourism coupled with effective leadership and management skills. Internship organized during the program provides the context for learners to integrate theory and practice and apply their learning via a variety of business situations.</p> <p>The curriculum is comprised of core and elective courses with a strong suggestion to take both Micro- and Macro-Economic as well as Business Statistics to further enhance job opportunities at a managerial level. Curriculum is designed to help students understand economics, budgetary analysis, fiscal management, and marketing theories and practices within domestic and global organizational settings. The program is intended to develop students' ethical leadership skills as well as communication, problem-solving, and critical-thinking abilities. Students have the opportunity to study topics related to personnel relations, including employment regulations, hiring practices, workforce development, change management, dispute resolution, and employee compensation.</p>	<p>Name: Aghavni Surname: Hakobyan Phone: 374 10 593 484 Email: <a href="mailto:int@asue.am">int@asue.am</a></p>

	<p><b><u>Name: Bachelor in Accounting</u></b></p> <p><b><u>Short Description:</u></b> ASUE Bachelor in Accounting Program is designed to provide knowledge and skills necessary to an accounting career. The program combines courses of financial and managerial accounting with specialized courses in business management, finance and microeconomics. The four-year Bachelor degree is designed to prepare graduates for career of accountant, financial manager and auditor in various fields of business activity. The importance of international issues is emphasized throughout the curriculum, along with core competencies in technology and communication. The program also addresses communications and leadership skills, strategic and critical thinking skills, and technology skills of the professional accounting environment and provides additional coverage on the International Financial Reporting Standards (IFRS). Students take various business disciplines including economics, statistics, business and taxation law, corporate finance, and marketing to provide the general business overview and context necessary for accounting studies. This program is consistent with generally accepted accounting principles, including the accounting processes and knowledge areas that lead to professional certification.</p>	
MA Programme(s)	<p><b><u>Name: Master of Business Administration</u></b></p> <p><b><u>Acronym: MBA</u></b></p> <p><b><u>Short Description:</u></b> The Master of Business Administration degree provides the student with business knowledge and abilities for cross-functional decision-making. The Master of Business Administration (MBA) is designed for mid-career professionals whose careers and management responsibilities transcend a single functional specialty and require a broad array of specialized knowledge and skills. The emphasis of this interdisciplinary, integrated, and applied degree program is on the significant organizational and management processes that</p>	<p>Name: Aghavni Surname: Hakobyan Phone: 374 10 593 484 Email: <a href="mailto:int@asue.am">int@asue.am</a></p>

take place in the context of large public or private institutions doing business on a global scale. The goal is to prepare students for upper management and executive-level positions by developing key managerial competencies—including critical thinking, systems thinking, team building, decision making, and ethical leadership—that can be applied in any type of business enterprise. The program will prepare graduates to:

- Apply business knowledge and skills effectively in a variety of settings,
- Demonstrate the ability to make strategic, integrative decisions,
- Analyze the evolving nature of corporations,
- Practice leadership with change management,
- Measure an organization's intellectual assets,
- Identify how product development merges with entrepreneurship,
- Foster new approaches to measure the economic performance of organizations,
- Demonstrate an understanding of professional responsibility, ethical obligations, and social awareness
- Demonstrate competency in the global aspects of business.

**Name: Masters in Management Information Systems**

**Acronym: MIS**

**Short Description:** MIS program provides strong organizational knowledge of information systems technologies for people with undergraduate degrees in MIS, as well as those with undergraduate degrees in other business or non-business areas. The program is particularly noteworthy to those with a non-business undergraduate degree. The program prepares to students for a career as a systems analyst, business analyst or consultant.

In recent years, the growing need to find new ways to develop and manage information has given rise to activities that combine

	<p>elements of both computer science and management science. Although closely related, these elements are distinct. The focus is on the intersection of management and technology. The distinguishing feature of this program is its integrated approach to technical, organizational and systems elements within the curricula that will enable future managers and technical specialists to interact effectively in organizations.</p> <p>Our mission is to create analysts and managers who will lead their companies in global markets through the effective and strategic use of technology. Everything we will do in the MIS program begins with the conviction that for all firms in all future markets, sustainable competitive advantage will be built upon a technological foundation. The traditional approach to business education is isolated from technology. Aspiring technologists to enter the schools of engineering and science, while aspiring business managers matriculate in schools of business. The latter learn about management but not technology, the former about technology but not management.</p> <p>MIS program is a bridge between management and technology. The MIS program prepares students to analyze, design, develop, implement, coordinate, and control computerized information systems within organizational contexts.</p>	
PhD Programme(s)	<p><b><u>Name: PhD studies (Aspirantura)</u></b>  <b><u>Acronym: PhD</u></b></p> <p><b><u>Short Description:</u></b> The Ph.D. program at ASUE is designed for students interested in pursuing advanced study and conducting original research in Economics and Management. The Ph.D. equivalent degree (Doctor of Economics) is awarded after course work and completion (defense) of dissertation. In advancing to the Ph.D. equivalent degree, students pass through two major stages:</p> <p>I. Course work (theoretical and practical preparation) typically takes two years. During the first four semesters, students take courses to achieve competence in econometric methods, IT,</p>	<p>Name: Evgenya  Surname: Poghosyan  Phone: +374 10 59 34 54  Email: <a href="mailto:int@asue.am">int@asue.am</a></p>

technologies of research and advanced methods of economic fundamentals of microeconomic and macroeconomic theory. They also passed research and pedagogical internships in corresponding departments of ASUE.

**II. Completion of a Dissertation:** The culmination of the PhD program is the dissertation, which embodies the results of the student's original research. Work on the dissertation usually takes two, three years after completion of course work. Students working on dissertations participate actively in research workshops. The dissertation represents a significant contribution to the body of Economic knowledge. After completion, faculty committee must approve the dissertation. The student takes final oral examinations (minimum exams) on the subject of the dissertation. Defense of dissertation and awarding of degree is organized by ASUE specialized council under State Supreme Certification Commission of RA

ASUE provides PHD studies in different areas of Economics and Management and offers 6 special PHD programs:

**1. Theoretical Economics**

The Ph.D. program in Economics at ASUE trains students in economic theory and the tools of economic analysis. Through course work, participation in seminars, and supervised research students are taught to conduct theoretical and empirical research at the highest level. The program equips its graduates with modern economic techniques.

**2. Economics and Management of Economy and Economic Branches**

The Program is the highest degree awarded in the field of business. Typically, this degree is reserved for individuals wishing to pursue academic research or teaching careers as professors at management or business schools. Students are offered to conduct applied research in different fields, such as management, marketing, microeconomics, business, and environmental economics. The program enables students to take

leadership positions in economic research in the academic, business, and government worlds.

### **3. Finance, Circulation and Credit**

ASUE postgraduate program in Finance provides students with a solid foundation in the theoretical and empirical tools of modern finance, drawing heavily on the discipline of economics. The department prepares students for careers in research and teaching at academic institutions, focusing on Asset Pricing and Portfolio Management, Corporate Finance, International Finance, Financial Institutions and Macroeconomics. The program is designed to provide a broad based training in theoretical and empirical research in Finance.

### **4. Accounting and Statistics**

The Program trains students to conduct research on accounting and Statistical issues. Emphasis is placed on developing a conceptual framework and set of skills for addressing the general problem of evaluating accounting alternatives. Issues of financial reporting, managerial accounting, and taxation are the ultimate concern. Special emphasis is given to applying basic knowledge of economics, finance, decision theory, and statistics. As a result, the PhD Program offers broadly based, interdisciplinary training that develops the student's skills in conducting both analytical and empirical research.

### **5. Global Economics**

The Program is designed for highly qualified and motivated students who wish to acquire the research and analytical skills of the international scientific community in economics. Students are required to attend advanced courses in International Economics, covering the most recent developments both in trade theory and policy and in international money and finance. Successful students are expected to conduct professional careers in universities, public and private research and consulting organizations, and financial institutions.

### **6. Economic-Mathematical Methods and Modeling**

The aim of the Program is to educate graduate students in the

	<b>fields of mathematical analysis and mathematical modeling, Information technologies and in the applications of mathematical and numerical analysis to science and technology. The goal is to enable PhDs to work as high level researchers in these fields in universities, research institutes, and private companies. The program offers two specializations- Economic -mathematical modeling and Information Technologies in Economics.</b>

## Programmes/Courses Taught in ENGLISH at Armenian Higher Education Institutions (HEIs)

HIGHER EDUCATION INSTITUTION		PROGRAMME SUPERVISOR CONTACTS
BA Programme(s)/ Courses	<p><b>Name:</b> Yerevan Brusov State University of Languages and Social Sciences  <b>Acronym:</b> YSULS</p> <p><b>Name:</b> American Discourse in a Globalized Culture (elective)  <b>Acronym:</b> ADGC  <b>Short Description:</b> Not only words, but clothes, dances, paintings, symphonies, architecture and a variety of other culturally determined creations can be read as signs that mean things, in certain languages, with their own assumptions about what the world is and how it works. The images, writing, and music that are produced in the United States through the film, television, and music industries, newspapers and magazines, and even individual postings of "selfies" on sites such as YouTube constitute a system of such interrelated signs that in its totality bounds what can be called American Discourse. These determine what is "cool" and what is not.  The purpose of this course is to examine American Discourse, and the method used will be to collect and study the ensemble of signs, or discourse, that is produced in the United States and distributed around the world through television shows, music, and so on.  Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name:</b> Armen  <b>Surname:</b> Karayan</p> <p>Phone: +37455112171  Email: <a href="mailto:armen.karayan@gmail.com">armen.karayan@gmail.com</a></p>
	<p><b>Name:</b> Music as a Means of Intercultural Communication (elective)  <b>Acronym:</b> ICTM  <b>Short Description:</b> This is an elective course available to 3<sup>rd</sup> year "Translation Study" students. The course is designed to help students understand and appreciate Western classical music. Interchangeably, the student also learns certain principles about intercultural communication.  Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name:</b> Edward  <b>Surname:</b> Manukyan</p> <p>Phone: +37498668770  Email: <a href="mailto:manukyan@edwardmanukyan.com">manukyan@edwardmanukyan.com</a></p>
	<p><b>Name:</b> English and Armenian Lexicography and Language Documentation (III year/ Elective)  <b>Acronym:</b> EALLD</p>	<p><b>Name:</b> Mariam  <b>Surname:</b> Tufekchyan  <b>(Ph.D., Associate Professor)</b></p>

	<p>Short Description– This course introduces students to the history of English and Armenian lexicography and language description, contemporary forms of language documentation and corpus linguistics, covering both theoretical and practical issues. It also introduces students to the methodology of lexicography, in particular the ability to undertake research. The bases of lexicography and language documentation serve the aim that the most wide-spread contemporary use of English throughout the world is that of English as a lingua franca (ELF), ie., English used as a common means of communication between speakers of different first-language backgrounds. Our studies include not only theoretical issues of classical lexicography, but as well of its contemporary forms; one is VOICE which is a structured collection of language data, the first computer readable corpus capturing spoken ELF interactions of this kind. This course will enhance the understanding of lexicography in general, dictionaries, especially modern e-dictionaries, their types and structure. The students will investigate different linguistic corpora which are closely connected with modern language description problems. The course is highly evaluated as it is observed in the context of modern lexicography. It is expected that the theoretical and practical knowledge gained from the course will help students enhance their written and oral communication skills as well as develop future research. The course covers the needed minimum and is built up from simple to complex.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p>Phone: 093-56-21-24  Email: <a href="mailto:mariamtufekchyan@mail.ru">mariamtufekchyan@mail.ru</a></p>
	<p><b>Name: Media and Communication (III year/Elective)</b>  <b>Acronym: MC</b></p> <p>Short Description: This course is designed to provide the students with an overview of the history, structure, performance, and effects of the major communications media. It analyzes the effects of mass media on human cognition, social norms, attitudes, and behaviours of individuals, groups, and organizations. Students will examine the performance of the news and entertainment media – the so-called “infotainment” – and will look into the media of the future and the environment in which we live and work. A major emphasis in this course is the development of analytical and argumentative thinking and writing skills.</p> <p>During the course students will be reading about the media, will be looking with a critical eye at the media, and, most importantly, will analyze the media.</p> <p>One of the difficulties in analyzing the media is that it is hard to see them objectively. Yet, whenever researchers analyze data, they must not be influenced by their own biases and experiences. They must examine the data and draw conclusions from them based on the actual investigation, not based on prior assumptions.</p> <p>No special background knowledge in mass media is required for this course. The knowledge of English for this course corresponds to level gradation B2 “Vantage” and partially to C1 “Effective Operational Proficiency”.</p> <p>According to B2 the student is supposed to understand texts on abstract and concrete subjects, the main idea of rather difficult texts. The student is supposed to be able to lead fluent spontaneous discussions, express his or her point of view, present different views on the same subject, showing their advantages and disadvantages.</p> <p>Level B2 comes close, though not completely, to C1 which presupposes a higher level of operating the language including free discussions on professional topics, exchange of viewpoints. The student should be ready for</p>	<p><b>Name: Larisa</b>  <b>Surname: Panyan (Senior Lecturer)</b></p> <p>Phone: 099-30-51-99  Email: <a href="mailto:nangracy@yahoo.com">nangracy@yahoo.com</a></p>

	<p>debates.</p> <p>At the conclusion of the course, the students are supposed to have critical understanding of the role of mass media in our lives, and of the demands on the professionals who create and distribute media content. What is learned in this course will make the student a more critical media consumer and a more mindful media producer. It will help the students to have a better idea of the career paths open to them upon graduation, and how to precede down those paths.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	
	<p><b>Name: Argumentation Skills (IV year/Elective)</b></p> <p><b>Acronym: AS</b></p> <p><b>Short Description:</b> The course has been designed for developing Bachelor degree students' critical thinking skills through reinforcing their debating skills. The course emphasizes the development of oral communication skills and aims at enhancing students' skills in bringing arguments, taking notes, paraphrasing, summarising and retelling their or others' views. Debates will be held during the classes for making the learning process interactive, and the debate topics will concern a variety of contemporary political, economic and social-cultural issues. These will motivate students to offer solutions and support their statements with arguments.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Ani</b>  <b>Surname: Hakobyan</b>  <b>(Lecturer)</b></p> <p>Phone: 099-01-08-02  Email:  <a href="mailto:ani.hakobyan@oxfordalumni.org">ani.hakobyan@oxfordalumni.org</a></p>
	<p><b>Name: Political Terminology (IV year/Elective)</b></p> <p><b>Acronym: PT</b></p> <p><b>Short Description:</b> This elective course is intended for the students of the faculty of Linguistics and Intercultural communication, B2+ level CEFR, which means that students can use a wide range of language structures with very few errors and can express ideas and opinions on a variety of topics. You can exchange information reliably and have an active command of the essentials of the language.</p> <p>The course introduces students to English terminology of <i>Political Science</i>, fundamental to the study of political science for Armenian learners of English of the above-mentioned faculty. It also introduces students to the methodology of political science, in particular the ability to undertake research, think critically and develop coherent, written and oral arguments. The bases of politics, political attitudes, political interactions and institutions of politics will be examined in English. The course will equip the students with the necessary knowledge that will enable them to comprehend and analyze the political terminology and the processes of its creation. The texts will include the main concepts and definitions of politics and government, political parties and party systems, institutions of politics: legislatures, executives, International Regimes, International organizations, Globalization, Failed States, Terrorism. This course will help students get the opportunity to acquire a feeling for the terminology and ideas involved in political science. It will help students enhance their written and oral communication skills.</p>	<p><b>Name: Hovhannes</b>  <b>Surname: Sargsyan (Ph.D.,</b>  <b>Senior Lecturer)</b></p> <p>Phone:099-30-92-99  Email:hovhannes.sargsyan.85  @bk.ru</p>

	<p><b>Name: Theory of English Grammar</b>  <b>Acronym: ThEG</b></p> <p>Short Description: This course is a theoretical outline of English grammar with a functional focus – a grammar in theory - which provides a description of the grammatical structure of English and its functioning. The course presupposes the knowledge of practical English grammar and moves the students into the <i>scientific analysis</i> of English grammar and its functioning. It consists of two basic sections: morphology and syntax.</p> <p>In this course, students come to learn different grammar theories, approaches of different scholars to a given grammatical category and its definition.</p> <p>The primary goal of the course is to familiarize the students with a variety of grammar theories existing in modern linguistics. Also, the course is intended to introduce students with the most up-to-date problems with respect to the grammatical study of English and its functioning. Students are also expected to develop their own analytical and critical thinking around a given grammatical problem, express their own viewpoints on a variety of issues.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Narine</b>  <b>Surname: Hovhannisyan</b></p> <p>Phone: /+37493/ 01 01 93  Email: <a href="mailto:narinehovhannisyan@yahoo.com">narinehovhannisyan@yahoo.com</a></p>
	<p><b>Name: Social History of English</b>  <b>Acronym: SHE</b></p> <p>Short Description: This course offers a basic introduction to those linguistic concepts useful to understanding the development of the complex history of the Germanic languages as practiced with reference to one language, English. “History” in this course is understood as a sequence of changing patterns behind the sum of countless concrete events. In a sense, the internal history of a language determines what one chooses to call its external history. Since social, political, and economic events have caused our linguistic patterns to change, we expect a history of the English language</p> <ul style="list-style-type: none"> <li>• to describe English structure at various critical stages of its development and</li> <li>• to explain why one form of the language gets replaced by another through the social forces set in motion by various events.</li> </ul> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Narine</b>  <b>Surname: Hovhannisyan</b></p> <p>Phone: /+37493/ 01 01 93  Email: <a href="mailto:narinehovhannisyan@yahoo.com">narinehovhannisyan@yahoo.com</a></p>

The course will provide materials and tools for developing language proficiency and communicative skills in its various functional manifestations.</p> <p>The course of Reading Skills is designed to enlarge the students' knowledge of the vocabulary used in different spheres of life and to develop their analytical and critical thinking through text interpretations and discussions as well</p>	<p><b>Name: Arevik</b>  <b>Surname: Babayan</b></p> <p>Phone: /+37493/ 76 31 79  Email: <a href="mailto:babayanarev@gmail.com">babayanarev@gmail.com</a></p>

	<p>as through oral presentations on various issues. The course Reading Skills comprises the following aspects: Analytical <i>Reading and Book Discussion</i>. The above-mentioned aspects focus on a deep study of thematic vocabulary that will enable the students to correctly use vocabulary units in their oral and written communication for various purposes. The students will do the linguistic analysis of the texts for Analytical Reading, i.e. the students will paraphrase sentences, extracts, find stylistic devices, comment on certain sentences and passages. Further, the students will participate in discussions and debates on the main issues raised in the texts under study. The aspect Book Discussion intends to advance the students' understanding of the language of fiction and non-fiction, plot structure and different techniques that the writers employ in their works. The aim is to be fulfilled through the study of short stories by eminent Anglo-American writers.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	
	<p><b>Name: Reading Skills (I year)</b>  <b>Acronym: RS</b>  <b>Short Description:</b> The overall objective of this course is to develop tools and techniques to improve students' proficiency in English. Upon successful completion of this course, the student will have learned the skills and strategies corresponding to level A2 of the Common European Framework for modern languages [CEF 2001]. The present course is designed to enable students to understand, translate, analyze, paraphrase and render paragraphs from authentic sources, to interpret and evaluate the ideas and to develop reading, speaking and writing skills. Throughout the course the student will summarize and discuss stories, develop the abilities of analytical reading, enlarge the word stock by various types of oral and written exercises, which allow a maximum amount of individual practice and enable the student to personalize and apply the language they learn. The student will also construct and deliver his/her own monologues, dialogues and situations based on the learnt vocabulary and speech patterns. Discussions, presentations and reports that will be held during the classes will give students a great chance to make their vocabulary active. Namely, the course will enable the student: have a repertoire of basic language which enables him/her to deal with everyday situations with predictable content, have sufficient vocabulary to conduct routine, everyday transactions involving familiar situations and topics, communicate in a simple and direct exchange of limited information on familiar and routine matters, understand sentences and frequently used expressions related to areas of most immediate relevance.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Lusine</b>  <b>Surname: Nurijanyan</b>  <b>(Lecturer)</b></p> <p>Phone: 099-99-08-11  Email: <a href="mailto:lusinenurijanyan@yahoo.com">lusinenurijanyan@yahoo.com</a></p>

	<p><b>Name: Writing Skills</b>  <b>Acronym: WS</b>  <b>Short Description:</b> This course is intended for BA students (2-4 years – for all specializations). It is designed on the basis of the text corpus using the synergy approach with the other aspects, such as Reading Skills, Speaking Skills, Phonetics and Communicative Grammar. The <i>aim</i> of this course is to teach the students the fundamentals of paragraph writing, i.e. to help them acquire and develop the key skills and knowledge they need when they write in English. The course helps them put their ideas into paragraphs and finally organize their sentences into paragraphs. The course first focuses on paragraph writing (2<sup>nd</sup> year) and sentence structure, including types and ways of paragraph development, with the final aim to ensure the path from paragraph writing to essay writing (3<sup>rd</sup> and 4<sup>th</sup> years). The aim of the essay writing course is to introduce students at the intermediate and high-intermediate level to three-and-four paragraph essay writing. In this very course the students write different types of essays and expand various writing skills including error correction, grammar and punctuation usage, style, summarizing, and paraphrasing. The course helps the learners to improve their ability to write different types of essays and fine tune their writing skills. A variety of writing concepts and techniques are illustrated to guide the students in developing clearer, more organized writing.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Armen</b>  <b>Surname: Karayan</b></p> <p>Phone: +37455 112171  Email: <a href="mailto:armen.karayan@gmail.com">armen.karayan@gmail.com</a></p>

	<p><b>Name: Practical English</b>  <b>Acronym: PE</b>  <b>Short Description:</b> The course is intended for the students majoring in Translation Studies with B1- C1 (year 1- year 4) levels of the CEFR. It is mainly aimed at enhancing and strengthening language skills therefore considerable attention is paid to the chosen material, text analysis and interpretation as well as content-based vocabulary development. Thus the course ensures acquisition and development of the ability to work with the text from top to bottom contributing to the students' pre-translation skills development. Individual and home readings as well as translations of various items of news also serve to accomplish the aims and objectives of the course. 	<p><b>Name: Translation “home” (elective)</b>  <b>Acronym: TH</b>  <b>Short Description:</b> The result of several waves of immigration from about the end of the 19th century, the Armenian communities of the United States form a vital, multi-generational Diaspora spanning two world and the internet and all of the technological, cultural, and social changes in between. This Diaspora has produced many writers, several of whom have gained fame, but only a small number of them have been translated into Armenian. Aside from William Saroyan, Michael Arlen, and Leon Surmelian, the best known Armenian-American writers, there are literally dozens of other writers. The work that is required to translate these authors into Armenian has not been undertaken, and the rich and unique record of the Armenian historical experience that their work represents remains unavailable to the very audience that would be most interested in it. This course seeks to begin to address that lack by taking a closer look at the task of the translator of Armenian Diaspora literature into Armenian.   Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Armen</b>  <b>Surname: Karayan</b>   Phone: +37455 112171  Email: <a href="mailto:armen.karayan@gmail.com">armen.karayan@gmail.com</a></p>
	<p><b>Name: Theory and Practice of Literary Translation Related to Semiotics (elective)</b>  <b>Acronym: LTS</b>  <b>Short Description:</b> The aim of this course is to help students develop their skills as a translator of artistic literature translating from English into Armenian and from Armenian into English, researching the original and the translated products relating them to Semiotics. The course is going to enable students to go deep into the theory of literary translation as a philological discipline and a specific subject taken at the University, simultaneously introducing the translator’s “craft” in practice. The translation of artistic literature being one of unique, interesting, and mostly spread type of translation, mutually enriching the culture of various civilizations, peoples and nations, is the main subject of the “Theory and Practice of Literary Translation Related to Semiotics”.  Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Diana</b>  <b>Surname: Hambardzumyan</b>   Phone: +37493783561  Email: <a href="mailto:diana_hambardzumyan@yahoo.com">diana_hambardzumyan@yahoo.com</a></p>
	<p><b>Name: Public International Law (with Introduction to General Theory of Law)</b>  <b>Acronym: IL</b>  Short Description: The proposed course includes two modules: (I) introduction to Theory of Law and (II) the fundamentals of Public International Law.</p>	<p><b>Name: Anna</b>  <b>Surname: Khvorostiankina</b>   Phone: 091 62 06 90</p>

	<p>Taking into account students' major specializations (Political Science), this course introduces them to the basics of public international law preceded by the introduction to the fundamental jurisprudential concepts and theories.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p>Email: anna.v.khv@gmail.com</p>
	<p><b>Name: Introduction to Methods of Research</b>  <b>Acronym: IMR</b>  Short Description: This course is devoted to the technical issues of “searching” the appropriate sources required for proper analysis of legal issues and serving as the empirical data for the initial stage of scholarly research, as well as to the methodology of scholarly research. Taking into account the specialization of the students, the emphasis is made on the interdisciplinary and cross-disciplinary research.</p> <p>This course consists of four parts:</p> <p>Part I is devoted to the introductory issues and the fundamentals of academic ethics;</p> <p>Part II is focused on the primary and secondary sources used in legal practice and scholarship (legislation, court decisions, doctrine etc.), the methods of their search and the methodology of working with these sources (their structure, content and the situations when these sources should / could be used);</p> <p>In Part III the attention is paid to the theory and practice of [legal] argumentation. The issues of legal argumentation are discussed in the context of legal logic, legal hermeneutics, and different approaches to the understanding of the concept of law. Two topics focus on the particularities of legal argumentation in various types of legal discourse (with the focus on judicial and scholarly discourse) in written and oral language. The aim of this part is to introduce the students to the particularities of judicial reasoning and decision-making and the distinctions between the scholarly and judicial argumentation.</p> <p>Part IV is devoted to the scholarly research: the preparatory stage of the research; formulating research topics, hypothesis and research questions; identifying the appropriate sources and research methods. The most frequently applicable research methods are discussed in detail.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Anna</b>  <b>Surname: Khvorostiankina</b></p> <p>Phone: 091 62 06 90</p> <p>Email: anna.v.khv@gmail.com</p>
	<p><b>Name: Post-Conflict State-Building and International Organizations</b>  <b>Acronym: PCSBIO</b></p>	<p><b>Name: Violetta</b>  <b>Surname: Petrosyan</b></p>

	<p>Short Description: The growth in the number, scope and reach of international organizations through the 20th century to today has been unprecedented. The backdrop to this development in world politics is an intensifying interdependence among countries, communities and citizens. The need for international organizations as structures of inter-state cooperation is driven by the rapidly increasing complexity of world politics, encompassing issues such as trade disputes, refugee inflows, global financial crises and environmental concerns, to name a few. International organizations have become central pivots of global governance. Yet their role in managing complex global problems continues to be debated by political scientists, policy-makers, practitioners and citizens alike. This course will focus on the factors, which either enable or hinder the growth of international organizations. It will emphasize the role that international organizations play in managing complex problems in various issue areas and will identify the challenges they face in enhancing their performance.</p> <p>The course is designed for students to pursue two sets of goals: knowledge-building and skill-building. In terms of knowledge-building, students will be exposed to diverse and often divergent perspectives on international organizations that currently dominate debates in political science. These perspectives will then be used to analyze various issue areas where the engagement of international organizations has been extensive. International security, human rights, trade and development, and environmental protection are among these primary issue areas of international engagement covered in this course. The application and analysis of different perspectives and theories will enable students to generate a more nuanced and informed understanding of the subject at hand.</p> <p>The key question that will drive the course is the extent to which international organizations are able to alter the contours of state sovereignty. Are the international organizations the servants, or masters, of states? How do they operate and how are they structured? In what issue areas are they most powerful and purposeful as independent actors in world politics? What roles should they play in current affairs, particularly in considering problems such as post-conflict state-building processes in Afghanistan, Kosovo and Iraq?</p> <p>In terms of skill-building, the course is structured to enable critical thinking, public speaking, effective communication, and to enhance students' analytical skills. These objectives will be achieved through various experiential teaching methods such as case studies, presentations of critical commentaries based on the reading materials, reflection notes, and research papers, among others.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p>Phone: 091 06 44 04</p> <p>Email: <a href="mailto:petrosyan.violetta@gmail.com">petrosyan.violetta@gmail.com</a></p>
	<p><b>Name: Strategic planning</b>  <b>Acronym: SP</b></p>	<p><b>Name: Robert</b>  <b>Surname: Khachatryan</b></p>

The prerequisites for the course, few as they are, include C2 level of English on CEF of reference for languages. In general terms, the course assumes that the students are experienced language users, who recognize the value of increased knowledge in their specialization and wish to improve their practical skills in English. Students are also expected to possess personal skills that will allow them to plan and implement inductive assignments, to communicate more effectively in English in a variety of natural settings and converse more confidently on a range of topics (politics, society, ecology, etc.). The course will assist students by reducing spoken mistakes, expanding their vocabulary, and improving fluency and reading comprehension. Experience in using sophisticated language in both formal and conversational contexts will be enhanced, and materials will be selected from a number of contemporary sources and websites. Learning activities will include:</p> <ul style="list-style-type: none"> <li>* expanding vocabulary through collocation and word building exercises</li> <li>* involvement in group discussions on relevant topics in academic settings</li> <li>* developing presentation skills through practical speech delivery.</li> <li>* improving competence in written expression</li> </ul> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Christine</b>  <b>Surname: Grigoryan (Ph.D., Associate Professor)</b>    Phone: 091-41-46-46  Email: <a href="mailto:gchristina@mail.ru">gchristina@mail.ru</a></p>

	<p><b>Name: Speaking Skills</b>  <b>Acronym: SS</b>  Short Description: Year 2, semester 1- Focus on Effective Communication as a starting basis for better and effective expressive skills. Students become aware of their own skills both in verbal and non-verbal means.  Year 2, semester 2 - Focus on Critical Thinking as mainly based on the student's ability to think more analytically and even critically see issues from other perspectives. Students will gain better verbal skills with different topic discussions in order to assist in their verbal/critical expressive means.</p> <p>Year 3, semester 1 - Focus is on Debating skills. This skill will enable students to build their argumentative skills. Students will allow themselves to express their expressive means through argument for or against a particular topic with the correct strategic means of argumentation.  Year 3, semester 2 - Focus on Public Speaking. Students will have the ability to further develop their verbal communication skills in multiple ways (both analytical and argument) and carry out individual speech-making skills.</p> <p>Year 4 - Presentation Skill. Probably one of the most important and difficult skills to master. Here the students having to have learnt all previous speech-making tasks will be able to amalgamate all into their presentation abilities. As this skill does involve correct and effective communication using both analytical, argument and correct public speaking abilities. The course is also meant to develop business vocabulary glossaries; cross-cultural awareness; the ability to communicate with clarity, relevance, accuracy and variety using the adequate business vocabulary.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Anahit</b>  <b>Surname: Hovsepyan</b></p> <p>Phone: +37491341105  Email: <a href="mailto:anhovsepyan@gmail.com">anhovsepyan@gmail.com</a></p>

	<b>Name: Literary Translation</b> <b>Acronym: LT</b> Short Description: This course is designed for master students majoring in Translation Studies. It is defined within the CEFR and corresponds to the classic division into B2-C1/C2. The course aims at developing written translation skills of literary texts. The course provides various methods and techniques of literary text translation. It also seeks to develop their ability to read and perceive texts of various styles. The course is meant to enhance students' vocabulary, to develop their editing and proofreading skills, as well as various translation and research methods and techniques.	<b>Name: Anahit</b> <b>Surname: Hovsepyan</b>  Phone: +37491341105 Email: <a href="mailto:anhovsepyan@gmail.com">anhovsepyan@gmail.com</a>
	<b>Name: On-job Communication</b> <b>Acronym: OJC</b> Short Description: On-job communications is a course aimed to teach the students of Masters Degree and provide them with knowledge about intercultural communication. This course seeks to build the fascination that intercultural communication naturally holds for everyone. The course mostly concentrates on skills as oral and written communication provided by different textbooks. Website: <a href="http://www.brusov.am">www.brusov.am</a>	<b>Name: Anahit</b> <b>Surname: Hovsepyan</b>  Phone: +37491341105 Email: <a href="mailto:anhovsepyan@gmail.com">anhovsepyan@gmail.com</a>
<b>PhD</b> <b>Programme(s)/C</b> <b>ourses</b>	<b>Name: Language , Culture and Cognition</b> <b>Acronym: LCC</b> Short Description: The overarching objectives of the course are: to help the student explore a variety of cognitive domains /language, consciousness, theory of mind, and social/cultural cognition/, reveal ties between language, culture and cognition, cultural identity and language, summarize experiences in the field of linguistic education and intercultural communication as a means of intercultural dialogue and social solidarity, identify modern approaches to cross-cultural and cross-linguistic communication, links between different linguistic disciplines /pragmatics, semantics, cognitive science/, and to provide knowledge on multilingual education and culture. Students should make scientific projects and presentations on the topic of language, culture, cognition and cross cultural communication, a diverse range of both topically- and methodologically-oriented papers that speak broadly to this theme, and on other issues including, but not limited to the above-mentioned topics.  Website: <a href="http://www.brusov.am">www.brusov.am</a>	<b>Name: Gayane</b> <b>Surname: Yeghiazaryan</b> (Ph.D., Associate Professor)  Phone: 091- 40-69-88 Email:gyeghiazaryan@hotmail.com
	<b>Name: Discourse Analysis</b> <b>Acronym: DA</b> <b>Short Description:</b> The course describes the basics of discourse analysis, communication theory /system constraints	<b>Name: Gayane</b> <b>Surname: Yeghiazaryan</b> <b>(Ph.D., Associate Professor)</b>

	<p>and conversational analysis/, ritual constraints, scripts and communication theory, speech acts and speech events. It describes the relation of system signals to conversational analysis, presents the system components and the ways that outline the structure of communication, how these ways are signaled in social and cross cultural communication and how the content of communication is organized-via script theory, the relation between speech events and speech acts /considering classification of utterances into directives, commissives, representatives, declaratives, and expressives/.</p> <p>The course also presents rhetorical genre analysis, which reveals templates or scripts in the organization of discourse /narrative, descriptive, procedural, and argumentative text genres, along with comparison and contrast/. It describes the ways how to identify certain typical syntactic structures writers and speakers employ to express their intent, provides knowledge on theory of language on syntax, phonology, and semantics /cohesive ties and deictic markers that help make relations among sentences or clauses of the discourse more explicit/. The course focuses on examination of basic deictic markers /person deixis, spatial deixis, temporal deixis, time deixis, discourse deixis, social deixis/, on examination of major types of grammatical cohesive ties /reference, substitution, ellipsis, conjunction, and lexical ties/, on examination of oral versus written dichotomy, and of syntactical differences of spontaneous talk and polished writing /clausal versus sentential organization, left dislocation and topic-comment structures, nextness, parallelism, repair, conjoined versus embedded clauses/.</p> <p>The course describes the contextual analysis which is the combination of syntactic, pragmatic and context analyses, and how discourse and language might be modeled as a cognitive system, the methods used in contextual analysis and in layered analysis, the ability to use a layered analysis to demonstrate that language use is a structured social, cognitive, and linguistic enterprise, examination of the pragmatic meaning and of two types of implicature /conventional and conversational/, study of prosody, the suprasegmental system made up of intonation, stress, rhythm, and pitch</p> <p>The students are required to collect and transcribe natural conversational data - language produced by users in ordinary, everyday ways and used in fiction. Therefore the aim of this course is a reflective analysis of theoretical concepts as well as of the immediate personal spheres of experience of the students themselves and of other people.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p>Phone: 091- 40-69-88</p> <p>Email: <a href="mailto:gyeghiazaryan@hotmail.com">gyeghiazaryan@hotmail.com</a></p>
	<p><b>Name:Academic Writing</b>  <b>Acronym:AW</b></p> <p>Short Description: This course is targeted at developing the students’ skills in successful academic writing.</p> <p>The course presents an overview of the considerations involved in academic writing and upon successful completion of this course, the students will have learned the skills and strategies for maintaining effective academic writing. The task and activities are richly varied, ranging from small-scale language points to issues of how the students can best “position” themselves as junior researchers.</p> <p>You will become familiar with a variety of grammar forms appropriate for strong academic style as well as with arguments, and common forms of fallacious reasoning as well as emotional fallacies. The course includes a detailed treatment of the various kinds of evidence encountered in arguments; a strategy for avoiding plagiarism; and a strategy</p>	<p><b>Name:Naira</b>  <b>Surname:Gasparyan</b></p> <p>Phone: /+37491/ 32 51 47</p> <p>Email: <a href="mailto:gasparyan.naira@yahoo.com">gasparyan.naira@yahoo.com</a></p>

	<p>for evaluating complex arguments.</p> <p>During the course you will learn how to apply persuasive communication and persuasive writing with the aims of argument to inquire, convince, persuade, and resolve conflicts or negotiate a meaning.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	
	<p><b>Name: Philosophy of Translation</b></p> <p><b>Acronym: PT</b></p> <p><b>Short Description:</b> Theories of Translation begins with a reassessment of the idea that there can be such a thing as a verifiable and predictive theory of translation. In lieu of such theories, the course surveys the critical ideas that translators, writers, and philosophers have had since ancient times, but it goes beyond linguistic concerns such as "equivalence" and tests the philosophical foundations of different schools of translation in terms of their assumptions about meaning and history, as well as their approach toward the power relationship implicit between the original language and the destination language.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Armen</b> <b>Surname: Karayan</b></p> <p>Phone: +37455112171</p> <p>Email: <a href="mailto:armen.karayan@gmail.com">armen.karayan@gmail.com</a></p>
	<p><b>Name: ELT (English Language Teaching) Methodology for Nursery and Elementary School Learners</b></p> <p><b>Acronym: ELTMNESL</b></p> <p><b>Short Description:</b> This elective course is designed for the 3<sup>rd</sup> year BA students specializing in Pedagogy. The course aims to introduce the students the contemporary methods of teaching English to preschool and elementary school children, particularly various modes of implementation of visual aids, flash cards, ICT tools, encouraging techniques, repetition - imitation strategies, creative and critical thinking, as well as developing young learners vocabulary and pronunciation skills by different Games, Songs, Chants and Rhymes. As active listeners, students are welcomed to bring forward their approaches concerning the modes of implementation of several activities for the formation and development of young learners' listening, speaking, reading and writing skills. So after having observed and somehow experienced the functions of kindergarten and the elementary school teachers, students are introduced the 'topics and themes' approach to lesson planning, before looking at how young learners can be assessed.</p> <p>Website: <a href="http://www.brusov.am">www.brusov.am</a></p>	<p><b>Name: Naira</b> <b>Surname: Poghosyan</b> <b>(Ph.D., Associate Professor)</b></p> <p>Phone: /+37493/ 21-18-39</p> <p>Email: <a href="mailto:nairapoghosyan@yahoo.com">nairapoghosyan@yahoo.com</a></p>

## Programmes/Courses Taught in ENGLISH

HIGHER EDUCATION INSTITUTION	Name: <b>Public Administration Academy of the Republic of Armenia</b> Acronym: <b>(PAARA)</b> <a href="http://www.paara.am">www.paara.am</a>	PROGRAMME SUPERVISOR CONTACTS
MA Programme(s)/Courses	<p>Name: <b>Principles of Economics</b></p> <p>Short Description: The course in <b>Principles of Economics</b> examines the allocation of scarce resources and the economic reasoning used by people as consumers, producers, investors, and as government agencies. Key elements include the study of scarcity, basic problems of economic organization, supply and demand, elasticity of supply and demand, market structures, the role of government, measuring national output, money and financial institutions, inflation, business cycles and unemployment, income distribution and re-distribution, state budget, fiscal policy, deficit and the government debt, and international trade.</p>	<p>Name: <b>Tereza</b> Surname: <b>Khechoyan</b> Phone: <b>+374 94 925025</b> Email: <a href="mailto:Khechoyantereza@yahoo.com">Khechoyantereza@yahoo.com</a></p>
	<p>Name: <b>International Economic Relations</b></p> <p>Short Description: The course in <b>International Economic Relations</b> is based on the theory of market relations and is a basic connecting link for studying important courses, such as international marketing, finance, and accounting. During the lectures definitions of international relations are given, as a study of trade between different businesses of different countries, as well as emerging foreign economic relations.</p>	<p>Name: <b>Tatul</b> Surname: <b>Manaseryan</b> Phone: <b>+374 94 458910</b> <b>+374 91 458910</b> Email: <a href="mailto:tatoulm@gmail.com">tatoulm@gmail.com</a></p>

<b>PhD Programme(s)/Courses</b>	<p>Name: <b>Political Globalization</b></p> <p>Short Description: The course covers material on multidimensional issues of political, economic, civilizational aspects of contemporary interdependent global system. Whilst exploring the basics of civilizational dialogue, transformation of global actors, shifting nature of the state and political power, civilizational particularities, threats to the global community and other relevant topics, the course gives a multidisciplinary perspective on processes of globalization and offers an interactive, discussion-based environment with an open eye for comprehending future changes.</p>	<p>Name: <b>Ruben</b>  Surname: <b>Ellamiryan</b>  Phone: +<b>374 055777095</b>  Email: <a href="mailto:rub.elamiryan@gmail.com">rub.elamiryan@gmail.com</a></p>
	<p>Name: <b>Theory of Bureaucracy</b></p> <p>Short Description: The course illustrates the theoretical and practical framework of the governmental organization, in particular the role of the institute of state bureaucracy in sustaining efficient, effective and responsive political dialogue between state institutions and the citizenry. Issues highlighted will include essential theories as well as comparative perspectives of public administration, core elements of organizational management: theory and practice, theories on bureaucratic governance, human resources management, civic consciousness, best practice, New Public Management, Good governance, E-democracy, E-bureaucracy, etc.</p>	<p>Name: <b>Karen</b>  Surname: <b>Galoyan</b>  Phone: +<b>374 091456595</b>  Email: <a href="mailto:Karen_galoyan@yahoo.com">Karen_galoyan@yahoo.com</a></p>

## Programmes Taught in ENGLISH at NATIONAL POLYTECHNIC UNIVERSITY OF ARMENIA

<p><b>Name:</b> NATIONAL POLYTECHNIC UNIVERSITY OF ARMENIA</p> <p><b>Acronym:</b> NPUA</p>	<p><b>CONTACT</b></p> <p>Maria Mangasarova Head of International Cooperation and Grant Programmes Department</p> <p>Tel: (+374 10) 56 79 68 Email: <a href="mailto:intof@seua.am">intof@seua.am</a>, <a href="http://www.polytech.am">www.polytech.am</a></p>
<p><b>BACHELOR Programmes</b></p>	
<p><b>Name: SOFTWARE ENGINEERING</b>  <b>Acronym: SE</b>  <b>Short Description:</b>  The program is aimed at preparation of specialists in the field of creation and application of software for different types of computing (CS) and automated systems (AS), related to the needs of a wide range of human activity sphere.  On the basis of acquired knowledge and skills graduates are able to solve practical problems in:</p> <ul style="list-style-type: none"> <li>• Selection and transformation of mathematical models of effective realization of software and CS facilities.</li> <li>• Design of systems and applied software on the basis of modern methods, means and programming technologies.</li> <li>• Development of supporting documents for the usage of programs and programming systems.etc.</li> </ul> <p>Thus, the objects of professional career activates of CS graduates are programs, programming systems and complexes, their mathematical and algorithmic models, design methods and means of production, implementation and applications in different fields.</p>	
<p><b>Name: TELECOMMUNICATION</b>  <b>Acronym: TC</b>  <b>Short Description:</b>  The program provides opportunities for the students to gain deeper knowledge in the multi channel telecommunication systems and is designed to give both a theoretical background and practical experience in the area of technologies, methods and resources of information transmission in the space.  The program includes:  Multi channel systems and networks of transmission,  Optical transmission systems and networks,  Technological systems and means of transmission of sound, pictures and any kind of signals by wire and optical channels,  Systems and resources of data transfer and computer networks, etc.  The graduates are expected to have job opportunities in the sphere of development, maintenance and services of telecommunication systems and products.</p>	
<p><b>Name: INFORMATION SYTEM</b>  <b>Acronym: I-S</b></p>	

**Short Description:**

The program of this major is related to the analysis, design, development and application of the following types of information systems:

Information Processing and Automated Control Systems

Computer Aided Systems

Software for Automated Systems

Management Systems (Organizational Control, Banking operations, etc.).

This program develops theoretical knowledge and practical skills that the graduates need to adapt to the rapid changes in their future professional life.

**Name: BIOMEDICAL ENGINEERING****Acronym: BE****Short Description**

The program is aimed at preparation of specialists in the field of creation and application of biomedical devices. On the basis of received knowledge and skills the graduates will be able to solve practical problems related to the methods of investigation of human diseases, biophysical processes proceeding in the organism, designing of bio prosthesis and operation of corresponding devices.

The offered program includes:

- Biomedical electronic and microprocessor devices,
- Biomedical optoelectronic devices,
- Design of electronic system of bio prosthesis,
- Biomedical ultrasound devices.
- Biomedical laser devices, etc.

The graduates will have a job in clinics and hospitals equipped with modern medical devices and in other institutions where are making medical researchers.

**Name: ELECTRONICS, MICROELECTRONICS****Acronym: E, ME****Short Description:**

The program is aimed to preparing specialists for applications or analogue and digital electronic devices in different fields of industry and economics, as well as in consumer products (devices).

The students involved will acquire knowledge in:

Computer aided design;

Analysis and modelling;

Testing and diagnosing;

Technical servicing and manufacturing technology processes.

The graduates of the program will acquire such theoretical knowledge and practical skills that will allow them to perform professional activities in the field of industry of microelectronic and electronic devices, as well as in researching-designing and service of such devices.

The professional activities include the complex of means and methods that are dedicated to the design, elaboration, investigation, maintenance and services of electronic devices and equipments of different types.

**Name: ELECTRICAL ENGINEERING**

**Acronym: EE**

**Short Description:**

The program aims to train specialists in electromechanical systems and electro technology, including their control and regulation .The acquired knowledge and skills will allow the graduates to start their professional activities in the fields of producing and maintenance of power generators and compressors, mobile electric power plants and electric machines, transformers, automated lines, power cables and communication cables, capacitors, articles of illuminating, electric and electronic apparatuses, etc.

The electrical engineering program offered has the following options/specializations:

- Electro-mechanics (Electrical machines)
- Electric Drive and Automation of Industrial Plants and Production Complexes;
- Electric and Electronic Apparatuses;
- Electro isolation, Cable and Capacitor Engineering;
- Illumination Engineering and Light Sources;
- Electrical transportation.

The graduates can successfully work at enterprises of electrical industry and the power complex, as well as to continue their education at the Master's Program level

**Name: CHEMICAL TECHNOLOGIES AND ENVIROMENTAL ENGINEERING**

**Acronym: CHTAEE**

**Short Description:**

Department aims at providing academically rigorous education in chemical technologies and environmental engineering and creating a learning environment, supportive for the development of practical skills.

**Name: APPLIED MATHEMATICS AND PHYSICS**

**Acronym: AMAP**

**Short Description:**

The curriculum is structured so that the students should gain substantial knowledge of theory combined with the skills to apply mathematics and computer systems in engineering and science and to develop software for different applications.

## **MASTER Programmes**

**Name: COMPUTER SCIENCE AND INFORMATICS**

**Acronym: CSAI**

**Short Description:**

The Department offers one of the most advanced computer science an IT- related programs in the region, aimed at producing graduates with a high level of academic background and professional experience. The majors available encompass a variety of areas from software development to information systems, computer engineering and information security.

**Name: INFORMATION TECHNOLOGIES**

**Acronym: IT**

**Short Description:**

The program of this major (specialty) is related to the analysis, control, development and application of the following types of information systems:

- Management information systems;

- Management information technologies;
- Financial-banking computer system;

Modelling of organizational- technical systems and research of operations.

This program develops theoretical knowledge and practical skills that the graduates need to adapt to the rapid changes in their future professional life.

Graduates are prepared to work in research and development areas or industry together with engineers and scientists, as well as in management operations.

### **Name: INFORMATION SECURITY**

**Acronym: IS**

#### **Short Description:**

The program provides ability to understand and practice in programming, firewalls as internet security, encrypted information

### **Name: TECHNOLOGIES AND EQUIPMENTS OF MACHINE BUILDING INDUSTRY**

**Acronym: TAEMBI**

#### **Short Description:**

The graduates of this Department programs are involved in the development and design of production machinery, instrumentation, technologies of machine building, control, and regulation systems and automation means for machinery operation, and other activities that constitute the foundation of today's manufacturing industry.

### **Name: MACHINE BUILDING AND MATERIAL DRAFTING**

**Acronym: MBAMD**

#### **Short Description:**

Graduates obtain competence in theoretical and applied mechanics, mathematics, material properties, system dynamics and the related areas. The emphasis on computer- aided design ensure that the future expert has the necessary skills in computer- aided machine design.

### **Name: BIOMEDICAL ENGINEERING**

**Acronym: BE**

#### **Short Description:**

The program is aimed at preparation of specialists in the field of creation and application of biomedical devices. On the basis of received knowledge and skills the graduates will be able to solve practical problems related to the methods of investigation of human diseases, biophysical processes proceeding in the organism, designing of bio prosthesis and operation of corresponding devices.

The offered program includes:

- Biomedical electronic and microprocessor devices,
- Biomedical optoelectronic devices,
- Design of electronic system of bio prosthesis,
- Biomedical ultrasound devices.
- Biomedical laser devices, etc.

The graduates will have a job in clinics and hospitals equipped with modern medical devices and in other institutions where are making medical researchers.

### **Name: ELECTRONICS, MICROELECTRONICS**

**Acronym: E, ME**

#### **Short Description:**

The program is aimed to preparing specialists for applications or analogue and digital electronic devices in different fields of industry and economics, as well as in consumer products (devices).

The students involved will acquire knowledge in:

Computer aided design;  
Analysis and modelling;  
Testing and diagnosing;  
Technical servicing and manufacturing technology processes.

The graduates of the program will acquire such theoretical knowledge and practical skills that will allow them to perform professional activities in the field of industry of microelectronic and electronic devices, as well as in researching-designing and service of such devices.

The professional activities include the complex of means and methods that are dedicated to the design, elaboration, investigation, maintenance and services of electronic devices and equipments of different types.

**Name: RADION ENGINEERING AND TELECOMMUNICATION**

**Acronym: RAEATC**

**Short Description:**

The program provides opportunities for the students to gain deeper knowledge in the multi channel telecommunication systems and is designed to give both a theoretical background and practical experience in the area of technologies, methods and resources of information transmission in the space.

The program includes:

- Multi channel systems and networks of transmission;
- Optical transmission systems and means of transmission of sound, pictures and any kind of signals by wire and optical channels;
- Systems and resources of data transfer and computer networks, etc.

The graduates are expected to work in the sphere of development, maintenance and service of telecommunication systems and products.

**Name: ELECTRICAL ENGINEERING, ELECTRO MECHANICS AND ELECTRICAL TECHNOLOGIES**

**Acronym: EE, EMAET**

**Short Description:**

The program aims to train specialists in electromechanical systems and electro technology, including their control and regulation. The acquired knowledge and skills will allow the graduates to start their professional activities in the fields of producing and maintenance of power generators and compressors, mobile electric power plants and electric machines, transformers, automated lines, power cables and communication cables ,capacitors, articles of illuminating, electric and electronic apparatuses, etc.

The electrical engineering program offered has the following options/specializations:

- Electro-mechanics (Electrical machines)
- Electric Drive and Automation of Industrial Plants and Production Complexes;
- Electric and Electronic Apparatuses;
- Electro isolation, Cable and Capacitor Engineering;
- Illumination Engineering and Light Sources;
- Electrical transportation.

The graduates can successfully work at enterprises of electrical industry and the power complex, as well as to continue their education at the Master's Program level.

**Name: INFORMATICS AND APPLIED MATHEMATICS**

**Acronym: IAM**

**Short Description:**

The program deals with mathematics and its application in engineering and science. Its solid theoretical core is a good base for our graduated to adapt to fast-paced developments in the professional market. The informatics component of the program makes the gained knowledge applicable to virtually every sphere in today's information society and innovative economy. The graduates have excellent records in obtaining challenging and fulfilling employment in a variety of

sectors including mathematical modelling, operating research, the computer industry and computational science, banking and financial services. They are able to work in research or industry along with engineers scientists.

## **PhD Programmes**

In the fields of

- Mathematics
- Mechanics
- Applied geometry and an engineering graphics
- Machine building
- Transport mechanical engineering
- Electro technics
- Machinery engineering, computing science information measuring hardware
- Radio engineering and telecommunication
- Informatics, computing hardware and automatization
- Energy
- Metallurgy
- Chemical technologies
- Biological sciences
- Light industry materials and productional technologies
- Power engineering
- Economics
- Geology
- Earth interior use technologies
- Earth- ecology preservation
- Sociological sciences

## Programmes/Courses Taught in ENGLISH at Armenian Higher Education Institutions (HEIs)

HIGHER EDUCATION INSTITUTION	Name: <b>National Academy of Sciences of Armenia</b> Acronym: <b>NAS RA</b>	PROGRAMME SUPERVISOR CONTACTS
<b>MA</b> <b>Programme(s)/Courses</b>	Name: <b>Molecular and Cellular Biology</b> Institute of Molecular Biology of NAS RA Acronym: <b>MCB</b>  Short Description: The Molecular and Cell Biology Master program is designed to give excellent theoretical and practical training and specialization in contemporary molecular and cellular biology followed by research work on Master's project. During the course, students will acquire many skills, both discipline-specific and cross-disciplinary and generic. The course is providing individuals with strong backgrounds in molecular genetics, gene and protein engineering, toxico-genomics, nanobiology and nanomedicine, functional genomics, proteomics, cellular immunology, molecular immunology, and bioinformatics. Student will study the complex mechanisms involved in cell-cell communication, intracellular signal transduction, regulation of gene expression, and immune response to foreign antigens and pathogens, structural organization of cells and their organelles, the control of cell division, and the processes that lead to cell differentiation, oncogenic transformation, cell aging and death. The course also provides basic knowledge on molecular and cellular pathomechanisms of human diseases, including pre-diseased and diseased conditions, disease progression and complications. Website: <a href="http://www.molbiol.sci.am/conferences/program.html">http://www.molbiol.sci.am/conferences/program.html</a>	Name: Gohar Surname: Mkrtchayn Phone: +374202621 Email: <a href="mailto:g_mkrtyan@mb.sci.am">g_mkrtyan@mb.sci.am</a>
<b>PhD</b> <b>Programme(s)/Courses</b>	Name: <b>Molecular and Cellular Biology</b> Institute of Molecular Biology of NAS RA Acronym: <b>MCB</b>	Name: Anna Surname: Boyajyan Phone: +37410 281702

	<p>Short Description: Current research activities of IMB are focusing on investigation of regulatory mechanisms of cell activity and its alterations in a number of pathologic conditions including autoimmune, autoinflammatory, cerebrovascular, infectious, oncological, and psychiatric disorders. The research, conducting <i>in vivo</i>, <i>in vitro</i>, <i>in situ</i> and <i>in silico</i>, includes human, animal, cell-cultures and computation modeling studies on genetic, protein, cellular, membrane, and sub-cellular levels. A special attention is paid to mediators of the immune and signal transduction systems. An important area of the research is <b>Armenian genome study</b> using pathogenomics, ecogenomics, immunogenomics, and population genomics approaches.</p> <p>Website: <a href="http://www.molbiol.sci.am">http://www.molbiol.sci.am</a></p>	Email: <a href="mailto:aboyajyan@sci.am">aboyajyan@sci.am</a>

<b>PhD</b> <b>Programme(s)/Courses</b>	Acronym: Short Description: Website:	Surname: Phone: Email:
-------------------------------------------	--------------------------------------------	------------------------------

**Armenian National Agrarian University, EVN Wine Academy**, a joint initiative between ICARE and Semina Consulting, offers study programs to prospective and practicing wine entrepreneurs, students and wine enthusiasts to empower them with the latest knowledge in global wine industry. The initiative to establish EVN Wine Academy is market driven and is based on recent wine production and demand trends in Armenia. The ICARE, with its professional capacity and international network, is a strong backbone of this initiative.

#### Expected Impact

- Specialization of young specialists in innovative wine production technology and wine business
- Creating a portfolio of practically skilled specialists for the Armenian wine branch
- Consultancy and vocational trainings for improving the quality, production process and better logistics of wine produced in Armenia.
- Increasing the visibility of Armenian wine sector and higher appreciation of wine culture in local market.
- Conducting research and informing the actors and supporters about new developments in the Armenian Wine industry
- Consulting wine makers in their production process and management

The Enology and Wine Business is an 18-month professional program, including the industry internship, open for all applicants pursuing a career in winemaking and wine business. The modules are taught in English by highly qualified instructors. Upon completion, the graduates receive a joint Certificate from ICARE and a partner European University.

#### Program Modules

- Introduction to Enology
- Enology/Viticulture Interface
- Grape & Wine Chemistry
- Wine Microbiology
- Wine Production
- Winery Equipment
- Sensory Evaluation
- Winery Sanitation
- Wine Business
- Wine Marketing & Tourism
- Winery Management

## Scholarships

Scholarships are available taking into account academic performance and financial needs.

## Reasons to Choose Enology and Wine Business Program

- Outstanding faculty
- Industry internship and professional experience
- Latest knowledge about wine business and technology
- Student-centered environment
- Access to professional networks

## Short Courses & Master Classes

**The short courses** are designed for wine professionals and wine lovers who want to expand their knowledge about wines. In addition, Master Classes are offered by highly professional wine experts from around the world. The short courses and Master Classes will help:

- To develop better understanding about wines,
- To learn more about winemaking and wine industry,
- To become a professional wine taster and connoisseur.
